

DESCRIPTION

A T connector for trim-less magnetic track lighting is a versatile component that allows you to join three track sections in a T-shaped configuration, enabling complex and flexible lighting designs. Specifically designed for trim-less magnetic track systems, this connector ensures seamless electrical continuity while maintaining a sleek, minimalist appearance. Its design integrates flawlessly with the track, creating a smooth, uninterrupted surface without visible edges or trims. Ideal for modern and sophisticated lighting layouts, the T connector

FEATURES

- They are designed to connect Three track sections at a right angle, making them ideal for corners and T-shaped lighting layouts.
- T connectors are designed to be low-profile and match the finish of the track, providing a clean, cohesive look in the overall lighting design.
- Made from durable materials, T connectors are built to withstand regular use and provide long-lasting support for your track lighting system.
- T connectors ensure a continuous electrical connection between the connected track sections, allowing power to flow seamlessly throughout the track system.

SPECIFICATIONS

- **construction:** Extruded Aluminum
- **Finish:** Powder Coated Black
- **Standards:** ETL

PART #	VL-TCORNER-R-BK
