

DESCRIPTION

Side-flanged trimless LED channels for drywall are an innovative solution for creating seamless, integrated lighting in modern interiors. Designed with flanges on the sides, these channels are embedded into drywall, allowing for a clean, borderless finish where the light source appears to emerge directly from the wall or ceiling. The trimless design eliminates the need for visible trims or borders, providing a minimalist and sophisticated look that blends effortlessly with the surrounding surface. Once installed and finished with plaster or joint compound, the side flanges ensure that the channel is securely anchored while remaining nearly invisible, allowing the focus to remain on the light itself.

FEATURES

- 78.5" Length
- 2 x end caps included
- Thermally-balanced design for maximum cooling long-lasting support for your track lighting system.
- Diffuser covers provide smooth light diffusion
- Suitable for 6mm, 8mm, 10mm, and 12mm indoor and outdoor tape

SPECIFICATIONS

- **construction:** Heavy-duty extruded Aluminum
- **Finish:** Silver
- **Standards:**

PART #	1515C
