

DESCRIPTION

Introducing the Dip 1" Low Profile Recessed Aluminum Channel, A recessed aluminum channel is a sleek and functional component used in modern lighting and interior design to house LED strip lights or other lighting elements. Designed to be embedded into surfaces like walls, ceilings, or furniture, this channel creates a flush, integrated lighting effect that enhances the aesthetic appeal of any space. The aluminum construction provides excellent heat dissipation, ensuring the longevity and optimal performance of the LED lights. Additionally, the recessed design allows for a clean, minimalist look, with the light source discreetly hidden while providing even illumination.

FEATURES

- 78.5" Length
- 2 x end caps included
- Thermally-balanced design for maximum cooling long-lasting support for your track lighting system.
- Diffuser covers provide smooth light diffusion
- Suitable for 6mm, 8mm, 10mm, and 12mm indoor and outdoor tape
