

DESCRIPTION

Surface-mounted LED aluminum channels are a sleek and efficient way to install LED strip lights on various surfaces, such as walls, ceilings, or furniture. These channels are designed to hold and protect LED strips while providing a finished, professional look to the installation. The aluminum construction offers excellent heat dissipation, which helps extend the lifespan of the LEDs and ensures consistent light output. With a low-profile design, surface-mounted channels blend seamlessly into the environment, making them ideal for both residential and commercial applications.

FEATURES

- 78.5" Length
- 2 x end caps included
