

2" Suspension / Surface Channel

DESCRIPTION

A 2-inch suspended or surface aluminum LED channel is a versatile lighting solution designed for both suspended and surface-mounted installations. This channel provides a robust housing for LED strip lights, allowing them to be securely mounted while ensuring optimal light distribution. The 2-inch width offers ample space for high-output LEDs, making it ideal for applications that require bright, even illumination. Whether suspended from the ceiling or mounted directly on a surface, this channel combines functionality with a sleek, modern design, making it perfect for commercial spaces, offices, or contemporary residential interiors where both style and performance are essential.

FEATURES
