

RY-10WL

DESCRIPTION

The Wet Location Emergency Light is a robust and reliable solution designed to provide safety and illumination in challenging environments. Built to withstand moisture and harsh conditions, this emergency light is UL listed for wet locations, ensuring compliance with rigorous safety standards. Equipped with a durable 90-minute backup battery, it delivers consistent lighting during power outages, giving you peace of mind when it matters most. Its rugged construction and energy-efficient LED technology make it ideal for outdoor spaces, industrial facilities, and any location requiring dependable emergency lighting in wet or damp conditions.
