## RY-MOUNTING-PLATE

### DESCRIPTION

The universal mounting plate is designed to provide fast, secure, and flexible installation for slim can-less recessed lighting fixtures. Engineered for compatibility with a wide range of ceiling types and joist configurations, it allows precise positioning without the need for traditional recessed housings. Its durable construction ensures long-term stability while simplifying installation in both new construction and retrofit applications. Ideal for residential and light commercial projects, this universal mounting plate offers a reliable solution for clean, low-profile recessed lighting installations.
