

ADJUSTABLE LED WALL PACK /3CCT /PHOTOCELL

WALL PACK

HYA-WPA-80W-TW3CCT

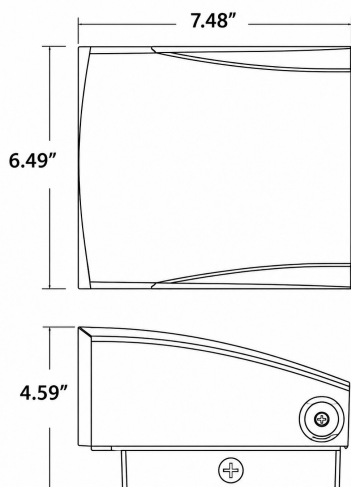

PROJECT

DESCRIPTION

Our Adjustable LED Wall Pack is a versatile outdoor lighting solution designed to provide exceptional performance, energy efficiency, and long-lasting reliability. Featuring field-adjustable wattage selection, it allows installers to easily customize the light output to meet the specific requirements of commercial, industrial, and security lighting applications. An integrated photocell automatically turns the fixture on at dusk and off at dawn, reducing energy consumption and maintenance. Built for demanding outdoor environments, this UL Listed wall pack is rated for outdoor use and delivers dependable illumination for building perimeters, parking areas, loading docks, walkways, and entrances. Its durable construction and flexible design make it an ideal choice for both new installations and retrofit projects.

SPECIFICATION DETAILS
